Top aides of Donald Trump quickly accused President Biden and his supporters of using their rhetoric to incite political violence. But officials said there was no evidence that a potential assassination attempt involving Mr. Biden was a Hamas operation in Gaza.

In a statement on social media, President Biden’s press secretary said the shooting was “not just some isolated incident.” The official added that Mr. Biden’s campaign was “deeply shocked and saddened.”

A Maryland man discovered that Bush presidents’ ancestors owned his forebears

Charles Holman had spent decades piecing together his family tree, poring over documents and collecting loose threads — stories, artifacts and memories that had been passed down through the generations. But he stumbled upon a piece of information that left him shocked.

Holman, 55, of Frederick, Maryland, had searched for his family’s roots for more than a decade, but nothing he found matched the records that he had recently discovered. Then he hit a dead end.

“Like many Americans, my family history goes back a few generations into slavery and then to the Civil War, and then to Reconstruction, and then to World War II,” Holman said in an interview.

“But when we stumbled upon these records, we realized that we had a connection to the Bush family.”

The connection was made through a documentary film about the history of the Bush family.
