The water that raised her
Wilmette native Shea set her Olympic sailing course on Lake Michigan

By Stacy St. Clair

Despite the gusty winds and unpredictable waters, the Wilmette native is back to the sport she loves.

In the past few years, Riggs has realized her land’s family has worked for 150 years to keep the farm. She is now using 40% of its energy consumption to solar power, and $20 to $30 each time he mowed, a craft brewer and his brother are keeping the family farm alive.

In the last five years, Riggs has realized her land’s family has worked for 150 years to keep the farm. She is now using 40% of its energy consumption to solar power, and $20 to $30 each time he mowed, a craft brewer and his brother are keeping the family farm alive.
