DUBAI – The United States struck bridges and an airport in Iran on July 17 and Tehran responded by hitting a power and desalination plant in Kuwait, as the warring foes risked further escalation by expanding their targets to include infrastructure.

In the contested Strait of Hormuz, where the renewed conflict has again cut off global energy supplies from the Middle East, U.S. Marines boarded a tanker, and another ship was reported to have been hit by a projectile. Another vessel was boarded by armed men off Yemen, though one maritime security source said the incident appeared to be an act of Somali piracy rather than linked to the war with Iran.

Trump revisits election security claims

President alleges China role in 2020 elections

Phillip M. Bailey and Joey Garrison
USA TODAY

President Donald Trump in a July 16 prime-time address sought to further sow distrust in U.S. elections, claiming broad vulnerabilities with voting systems and potential for interference from other nations.

Trump specifically pointed to China, alleging it interfered with the electoral process in 2020.

“Every American deserves to know that when they cast their vote, that vote will be counted accurately in a system, and that is to make that system secure – one where cheating and interference are not just difficult, but virtually impossible,” he said. “Unfortunately, the system we have today falls catastrophically short of that standard.”

The president said newly declassified documents will show China tried to undermine the 2020 election in several ways, including compromising U.S. voter data. He also said Americans have for years been “blatantly lied to” by the government about the security of election infrastructure, such as voting machines and ballot-counting systems.
